Brick Tavern Announces New Product Line

Source: Ad Ventures

Publication date: April 7, 2009

Brick Tavern Concrete Products of Hudson, New York, announces the addition of Easi-Set Transportable Precast Concrete Buildings to its line of concrete products. As a new licensee, Brick Tavern will produce Easi-Set Buildings in its Hudson plant.

Brick Tavern is a family owned concrete products company that has been doing business in Hudson for more than 25 years. The company began with selling burial vaults and gravestones and as business plateaued, took the next logical step of adding various concrete products lines. Tim Cantele, who owns the business with his wife, Diane, explains that Easi-Set was a natural fit. "Easi-Set was a natural choice for our company as we move forward. We wanted to move into a product line that was unique in the area and Easi-Set fit that ticket. They are a nationally recognized brand and very respected in their industry."

Brick Tavern recently began production of the Easi-Set precast concrete buildings in its new 10,000 square foot manufacturing facility. Prior to the beginning of production, all Brick Tavern employees received in-plant production training from Easi-Set experts focusing on the efficient set up, pouring, removing and yarding of the Transportable Easi-Set Buildings. Production training areas include in-plant, hands-on instruction related to ensuring Easi-Set's quality standards.

Easi-Set Buildings provide durability, flexibility, convenience, cost-effectiveness and long lasting security. The patented, post-tensioned building system provides even greater weather-tightness and impact resistance for the precast roof and floors.

Easi-Set Buildings are installed in a day, require no foundation and are relocatable! Easi-Set buildings are used for Storage, as Pump Buildings, for Power Substations, to house Communications Hardware, by Utility Companies, for HazMat Storage, as Restrooms (wet and dry), as Concession Stands, for Classrooms, and many Custom Applications. Where larger buildings are required, Easi-Span provides clear span sizes up to 40' x 200'.

To obtain more information about Easi-Set Transportable Precast Concrete Buildings or for information on licensing opportunities, contact Easi-Set Industries at 1 (800) 547-4045 or visit www.precastbuildings.com or www.easiset.com. To contact Brick Tavern Concrete Products, call 1 (800) 322-8105.
